Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 14-17, drawn to a manifold apparatus and method, classified in class 137, subclass 884.
- II. Claims 9-13, drawn to a compressor, classified in class 417, subclass 2.
- III. Claims 18-22, drawn to a welder and compressor, classified in class 219, subclass 133.

The inventions are distinct, each from the other because:

Inventions II, III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it is recited without. The subcombination has separate utility such as a manifold for another use.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
